EDUCATION

Bachelor of Science in Software Engineering 05/2022 - 06/2026 | Addis Ababa, Ethiopia

Addis Ababa University

- Top 10th University in Africa

Relevant Courses: Data Structures and Algorithms, Web Application Development, Object Oriented Programming, Computer Architecture and Organization, Fundamentals of Software Engineering, Machine Learning.

Africa to Silicon Valley (A2SV) 11/2023 - 11/2024 | Addis Ababa, Ethiopia

- Completed one year of data structures and algorithms education.
- Solved more than 900 Leetcode questions.
- Participated in community organized hackathons, contests and peer programming sessions.

PROFESSIONAL EXPERIENCE

Datasynx (startup)
Fullstack AI Developer (Freelance) **Jun 2025 - Jan 2026**

- Helped implement a network of AI agents for a workflow automation platform with integration to known workflow managers such as n8n
- Utilized Lang-chain and Lang-graph to create AI agents.

Mereb Technology
Junior Fullstack Developer (Onsite) **Oct 2024 - Aug 2025**

- Developed and implemented microservices based backend solution for a poker game application using gRPC and php.
- Collaborated with a team of engineers to create and maintain live game status updates and placeholders based game participation.
- Improved existing payout structure by introducing a grouped hands scheme that simplified payout configuration by 75%

Cynergy Bank
Python Developer (Remote) **Jul 2026 - Oct 2026**

- Helped develop an internal ai assisted tool to assess customer portfolios for lending and collateral management.
- Helped improve an existing ai assisted tool to assure data quality among internal banking systems.

PROJECTS

Skillspot github **Oct 2025 - Jan 2026**

- Built a service marketplace with Vue 3 and Django, featuring real-time messaging via WebSockets and Redis.
- Implemented Stripe Connect for automated billing and Celery for background task management.
- Streamlined deployment using Docker and automated API documentation with Swagger/OpenAPI.

Efoy github **July 2024 - Oct 2025**

- Designed and built a hospital appointment booking platform using fastapi and react.js from concept to deployment.
- Integrated virtual video consultation using steam video api and stripe for booking payments using stripe web hooks.
- Implemented an in app prescription system with digital signature,

ACHIEVEMENTS AND CERTIFICATIONS

- Impressive CGPA of 3.95/4
- Completed One year of intensive Data structures and Algorithms Camp at A2SV
- Ranked top 10 in Ethiopian CPC City Cup
- Participated in A2SV Internal Hackathon

SKILLS

- **Programming Languages** TypeScript, Python, Golang, JavaScript, C#, Java
- **Libraries and Frameworks** FastAPI, Django, Nest.js, React.js, Next.js, Vue, Angular.js, Express.js, MERN
- **Databases** PostgreSQL, AlloyDB, MongoDB, MySQL, Redis, Vector DBs(Weaviate)
- **Technologies and Tools** Git, Docker, GCP, Linux, gRPC, Microservices, Langgraph, Langchain, n8n
